

# Gold Pricing

To manage the gold pricing( for e-commerce page),

1. Click **Management**
2. Click **Gold Pricing**
3. Gold Pricing page will display as below. Admin can edit the **buy Margin** or **Sell Margin** and make sure to click on **Fetch latest gold rates from Data Provider** to make sure the gold rate been update automatically. Then click **Save & Update Price**

The screenshot shows the 'Gold Pricing' configuration page. At the top, there is a breadcrumb trail: 'Management / Gold Pricing'. The main heading is 'Gold Pricing' with a subtitle 'Gold Price Configuration'. Below this, there are three input fields: 'Symbol' with the value 'XAU', 'Buy Margin (%)' with the value '9', and 'Sell Margin (%)' with the value '9'. Each margin field has a blue percentage sign button on the right. Under the 'Additional Options' section, there is a checked checkbox labeled 'Fetch latest gold rates from Data Provider'. At the bottom left, there is a blue button labeled 'Save & Update Price'.
